

RAPTOR CENTER

The Raptor Center is a wildlife rehabilitation facility that has been saving magnificent birds of prey for over forty years. Founded in 1981, it is located in Pueblo at the Nature & Wildlife Discovery Center River Campus.

Experience the magic of birds of prey live and up close with a guided raptor tour! Reservations are required. To book a private tour, please call us at 719-549-2327. To book a public tour, head to our website.

ABOUT US

NWDC is a nonprofit environmental education and raptor rehabilitation center located in the City and County of Pueblo. Founded in 2018 through the merging of two veteran organizations who, combined, bring 50 years of high-quality nature programming to the Pueblo Community, NWDC now manages these two unique locations to better serve our community, engaging over 20,000 participants annually.

RAPTOR PROGRAMS

AT A GLANCE

Every year, we teach over 6,000 individuals about the importance of birds of prey in our ecosystem. We offer educational programs for all ages, both through our Raptor Center and off-site.

Through Raptor Programs, our staff will provide you with an informative and entertaining look into the lives of these magnificent creatures.

Our Raptor Programs are correlated to Colorado's Academic Standards for science and are designed to support public school STEM objectives.

RAPTOR PROGRAMS

Offered 9 am - 5 pm, Tuesday - Sunday

Live Bird of Prey Presentation

Learn about hawks, owls, vultures, eagles, and falcons! During this one-hour presentation, the naturalist will introduce you to two of our raptor ambassadors, tell their stories, and teach you about adaptations, hunting habits, anatomy, and natural history.

Owls of Colorado

Colorado has a wide range of habitats that several species of owls call home. In this one-hour presentation, you will meet two of our owl ambassadors and learn their personal backstories. The presentation will cover owl-specific adaptations, hunting habits, anatomy, and natural history.

Pellet Dissection Lab

A pellet dissection lab is a hands-on, highly engaging way to teach participants about raptors' digestion and regurgitation habits. This one-hour lab includes bird pellets, equipment, and of course, instruction!
